FOUNDATION FOR
FUTURE GENERATIONS

The young generations to transform the world

ACTIVITY
REPORT
2019-2020

Some key highlights ...

On 9 May 2019, at the HERA Awards, Marguerite Vanhee presented the Albert Vanhee Fund for Future Generations, which she had just created within the Foundation.

On 25 February 2019, the Parliament of the German-speaking Community, with the support of the G1000, voted unanimously to involve randomly chosen citizens in political decisions on a permanent basis.

On 22 January 2020, Benoît Derenne was named "Namurois of the Year 2019" in the "Service to society" category.

On 22 January 2019, the Foundation donated 20 years of archives to the State Archives in Namur, represented by its director Emmanuel Bodart.

... among the many that marked 2019-2020

Confidence, a conviction in these uncertain times

Having confidence in the future and the young generations. What could be more striking in these uncertain and anxiety-prone times?

The more that challenges gather before our eyes and become part of our lives, the stronger is this belief: there will not be a better future for future generations without a deep transformation of our ways of thinking and behaving, a transformation made possible by a 360° approach.

This is why the Foundation now offers continued support to the young generations concerned about our collective future. It is committed to setting up a true 360° "cycle of transformation" to help them at different stages of their lives.

Why? Because these young people help us to imagine our future, prototype it, build it and consolidate it. Through these different stages, they take the future on a journey that is an absolutely essential evolution and transformation. Thanks to your unfailing support, the Foundation is and will always be ever more by their side.

Let the movement of this positive cycle take you on a journey through the following pages and discover their faces, their dreams, their ideas and their achievements in the service of a world that is liveable today and tomorrow.

// It is a great privilege and a great responsibility to receive and transfer so much knowledge, energy and means for the benefit of the greatest number, present and future. //

Benoît Derenne
CEO

// Is the Foundation for Future Generations pessimistic or optimistic? I would say: realistic and determined. //

François Ost
Chairman of the Board

Founded by Benoît Derenne in 1998, the Foundation for Future Generations is the Belgian foundation dedicated exclusively to **the transformation of our society towards a sustainable development mode**, one of the biggest challenges of the 21st century. This pluralistic, independent not-for-profit foundation operates in all three regions of Belgium and in Europe.

A 360° transformative philanthropic platform

The mission of the Foundation is to profoundly **transform our society** to pass on a liveable world to future generations. It requires a truly 360° systemic approach combining all **four dimensions (4P)**, social (People), environmental (Planet), economic (Prosperity) and participatory (Participation), at the same time.

4P for a 360° approach

The Foundation offers **its patrons, donors and partners** a platform for philanthropic services. It is designed to **spread values and offer financial resources** for the benefit of future generations through transformative actions, encouraging as many players as possible to integrate this **360° approach** in depth over the long term.

We have **extensive experience in supporting project leaders** who implement sustainable initiatives, be they citizens, associations, universities, companies or public authorities. The Foundation **facilitates exchanges and collaboration** with its large community of patrons, donors and partners.

The Foundation for Future Generations embeds its 360° "4P" approach within the framework of the 17 United Nations Sustainable Development Goals.

The young generations to transform the world

Confident in the abilities of young people to profoundly transform the whole of society, the Foundation for Future Generations provides them with funds and a network, supports them and promotes them to other stakeholders and the general public at four key moments in their journey.

THINK, ACT AND INVEST 360°

GRADUATE & RESEARCH STUDENTS

The Foundation prepares master's students to think in 360°. It rewards **graduate and research students** for a transversal and 360° approach of their master or doctoral thesis.

STUDENT ENTREPRENEURS & PROTOTYPING

We finance projects developed by **student entrepreneurs** through the prototyping of 360° creative solutions.

SUSTAINABLE START-UPS CREATORS

We offer financial support to the creators of **sustainable start-ups and initiatives** in the early phase of their development.

SOCIAL ENTREPRENEURS

We make capital available to dozens of **social entrepreneurs** to further strengthen their high social impact.

*"The Foundation prepares and encourages the young generations to **think, act** and **invest 360°**."*

François Ost, Chairman

HERA AWARDS FOR FUTURE GENERATIONS

// Sowing the seeds, within the research community and among young students, of this need to adopt a more integrated, 360° approach is a fundamental challenge with regards to societal issues today. // **Natacha Zuinen**, SPW - Coordinator of the sustainable development department, President of the jury of the HERA Doctoral Thesis Award.

Young graduate and research students who think of tomorrow in 360°

"I am delighted with the ceremony tonight, which is for us a source of emulation, dialogue and inspiration", **Pierre Jadoul**, Rector Université Saint-Louis - Brussels.

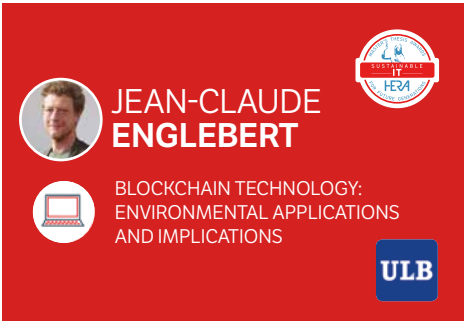

"It is a complex issue for universities to combine both excellence in research, leading to increasingly specialised fields, and the obvious need for integration, certainly in the field of sustainable development. The challenge is to recruit talents who are capable of opening up to several disciplines and combining them. This is key for the world of tomorrow, and the HERA Awards showcase this really well", **Yvon Englert**, Rector of the Université libre de Bruxelles.

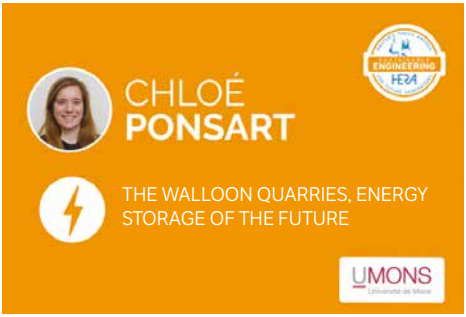

Due to the circumstances linked to COVID-19, the 24 young graduates receiving the HERA Awards 2020 were showcased as part of the "HERA Awards 2020 #StayHome #StayInspired" virtual campaign, symbolically hosted by the ULB.

Working conditions in agriculture have been problematic for centuries. Can agroecology help to improve these conditions? This is the question **Antoinette Dumont, winner of the HERA Doctoral Thesis Award 2019**, explored in her research work. The jury, chaired by **Natacha Zuinen**, underlined her nuanced insights that are very relevant for developing an agroecology that builds on the realities of today to truly propose a model of social justice.

Jean-Claude Englebert, winner of the HERA Award Sustainable IT 2019 set about to assess the environmental impact of blockchain technology, which notably underpins the Bitcoin and Ethereum cryptocurrencies. He also incorporates in his analysis the questions of governance and ethics. The jury, chaired by **Olivier de Wasseige**, underlined the timeliness and relevance of this work, which deserves follow-up.

Using water from Walloon quarries to store energy and therefore offer a solution to the intermittence of renewable energy production. That is the proposed innovation of **Chloé Ponsart, 2020 winner of the brand-new HERA Award Sustainable Engineering**, set up with the support of the Albert Vanhee Fund for Future Generations. The jury, chaired by **Géraldine Tran**, praised the pragmatism of the solution and highlighted its economic viability and industrial feasibility.

Belgian citizens' lack of interest and mistrust in the current political model is reflected during elections by the many blank, invalid and absent ballots. To rekindle democracy at the local level, **Julie Delvoye, winner of the HERA Award Sustainable Democracy 2020**, suggests taking these (non-) votes into account by allocating a number of seats in local government to citizens drawn at random. The jury, chaired by **Yasmine Boudaka**, applauded this innovative and legally feasible scheme.

www.fgf.be/hera2020

HERA AWARDS FOR FUTURE GENERATIONS

The HERA community comes together at various times in the year, forging links between award winners, jury members, professors involved and partners. These meetings make it possible to advance 360° thinking and to create synergies.

The HERA community is growing year on year

Award-Winners Day

// It's really inspiring to discover so many different projects in subjects and fields that we absolutely know nothing about. // **Adrien Hallet**, nominated for HERA Award Sustainable IT 2020

Summer Breakfast

The HERA Summer Breakfast 2019, hosted on 29 August at IBA.

// I particularly liked the get-togethers, the kindness of the participants, the shared feeling of wanting to change things. // **participant** in the HERA Summer Breakfast 2019

HERA contributes to 360° university courses

Workshops

The HERA team organises ten to twenty workshops every year in the country's six French-speaking universities. These workshops are centred around the four dimensions of sustainable development (people, prosperity, the environment, participatory governance) and within the framework of the 17 Sustainable Development Goals.

"Teaching Finance" workshop

Around one hundred participants debated the issue of sustainable finance education with a panel of experts comprising David Pitt-Watson (UK - renowned thinker, author and practitioner), Christel Dumas (BE - ICHEC Brussels Management School) and Luc Van Liedekerke (BE - KULeuven and AMS). With the support of the Foundation, a group of experts continued the discussion at the annual conference of the Global Research Alliance for Sustainable Finance and Investment at the University of Oxford.

Contribution to ARES

The Foundation chaired one of the two working groups of the Orientation Council of the Academy of Research and Higher Education (ARES). The working group oversaw the drafting of an opinion on the mission of higher education in supporting students in their role as responsible citizens and in promoting their autonomy and development.

With the support of

ALBERT VANHEE FUND FOR FUTURE GENERATIONS

// At the Foundation for Future Generations, I received an incredible welcome to launch the fund I had been dreaming of for some time. With this fund, I target students mainly in Engineering who, when they have a goal, work at it with passion, see it through and manage to bring it to fruition: they make it tangible and useful so that in future generations it will benefit tomorrow's world. // **Marguerite Vanhee**, founder.

Student entrepreneurs in the prototyping phase who innovate in 360°

The Foundation encourages and supports sustainable 360° innovation among student entrepreneurs. We boost a crucial phrase in the creator's journey, namely prototyping - a key stage during which an experimental version of a product or a process is produced to test and validate how it works.

With grants of up to €5,000, the Foundation wants to create leverage and bring these young entrepreneurs much closer to the ready-for-market stage of their sustainable invention. Among these innovations - some of which you can read about here - we have seen responses emerge to three societal challenges:

Shifting our energy consumption models

Lola and **Nathan**, student entrepreneurs in civil engineering (UMons) and management engineering (UCLouvain FUCaM Mons), founders of **Waste End**, received funding for the prototyping of a solution to **transform organic food waste into green energy (biogas) and natural fertilizer**.

Making life easier and safer for the most vulnerable

Lionel, Maxime and **Jérôme**, entrepreneurial students in industrial engineering (HELMo Gramme, Liège) and founders of **Bootrek**, received funding for the prototyping of a **wheelchair that allows people with disabilities to hike** in the countryside.

Promoting a more circular economy tending towards zero waste

Adélaïde, Laetitia and **Fiona**, student entrepreneurs in civil engineering (UCLouvain) and founders of **Greenzy**, received funding for the prototyping of an indoor composter for private consumers. Simple to use, stylish and easily integrated into a kitchen, Greenzy **grinds and mixes organic material to effortlessly obtain odourless soil**.

Thijs and **Tijl**, student entrepreneurs at Howest, received funding for the prototyping of **Baggies**, **reusable bread bags made of hemp** as an alternative to millions of single-use bread bags, whose paraffin content prevents recycling.

Find out +
www.fgf.be/etudiants-entrepreneurs

THE ENVIRONMENT FEDERAL MINISTER IN SUPPORT OF ZERO WASTE

As part of her action to raise awareness of key sustainable development issues, the Federal Minister for the Environment supported in 2019 and 2020 two calls for projects that highlight alternative approaches in the fight against waste. The resulting 15 initiatives in 2019 (as part of the Zero Waste Student Challenge) and 7 initiatives in 2020 (as part of support for student entrepreneurs) subsequently received support in the form of a grant, rewarding their innovative approach.

SUSTAINABLE START-UPS CREATORS

With the support of

SE'nSE FUND
SEED EQUITY & SUSTAINABLE ENTREPRENEURSHIP FUND

The SE'nSE Fund, created by Pierre Mottet, who was later joined by other patrons, is now in its 5th call for projects for start-up entrepreneurs. Since 2016, 15 initiatives have been selected for their transformative environmental scope by a jury of experts. They received financial support in the form of seed capital - up to €50,000 per project - as well as benefitted from increased visibility and networking.

Start-ups with positive societal impact

Focus on resilient and impactful entrepreneurship

From green energy to sustainable food, from construction to textiles and the circular economy, the winners of the SE'nSE Fund demonstrate that more and more entrepreneurs care about maximising their positive societal impact. Absorbing some of the risks with them in order for their initiative to strive is, for the Foundation and those who support it, a way to invest and believe in the emergence of a more sustainable and resilient economy.

Find out + **www.fgf.be/sense**

Philippe, Delphine and **Renaud**, young entrepreneurs and founders of the **urbike** start-up (Brussels), received funding for their cooperative, which promotes the delivery of goods by bicycle in the city. The aim: **to combine decent jobs with digital innovation and logistics** (bicycle containers).

Szandra created the **Little Green Box** cooperative to offer **meal boxes made of local**, **organic**, **seasonal products using a zero-waste approach** that avoids single-use containers. The recipes are designed with children in mind to involve them in developing a more sustainable way of life.

Hans and **Marie**, young entrepreneurs and founders of the start-up **Entusia** (Flanders), received funding for the development of their business, which sells **elegant and reusable underwear for light bladder leakage**. The products are made from bamboo and Tencel, sustainable materials that ensure very good absorption, comfort and discretion.

Ken and **Nicolas**, founders of **BC materials**, are **giving a second** life **to soil excavated** during building works by transforming it into new construction materials or coatings. With a neutral carbon footprint, a healthy atmosphere in new buildings as well as easy reuse, this is a promising innovation in a key sector of the economy.

GROWING SUPPORT FOR THE SE'NSE FUND

Since 2018, the **Aether Fund for Future Generations** has been committed to helping the creators of sustainable start-ups through a multi-year contribution to the SE'nSE Fund. A great example of mutual underpinning of the funds hosted by the Foundation! In 2020, the **Eurofins Foundation**, whose ambition is to contribute to global health and safety and to the protection of the environment, also supported the call for projects of the SE'nSE Fund.

With the support of

AETHER FUND
FOR FUTURE GENERATIONS

// The Aether Fund for Future Generations, which I created in 2018 within the Foundation, supports innovative projects, in particular those undertaken by social entrepreneurs who fight against the degradation of marine and river environments, which are increasingly under pressure from pollution and overexploitation. My wish to promote water-related projects through this fund comes from a passion for sailing, which I have practiced regularly since my childhood. // **Christian Simonard**, founder.

Social entrepreneurs
to safeguard seas and rivers

Leslie and **Elodie** and their **WeOcean** project, promote and connect **inspiring Mediterranean initiatives for a sustainable sea** via an online platform and documentary.

Francis, Anne-Marieke, Saskia and **Philip** have created **The Great Bubble Barrier, an innovative method that uses a bubble curtain to stop and catch plastic waste** present in rivers and canals in the Netherlands.

With the support of fishermen, project **Gildas, nominated for a HERA Award 2017**, is **reconstructing marine habitats for the preservation of the Malagasy coral ecosystem** and economic development of the region.

THE AETHER FUND FOR FUTURE GENERATIONS

The fund supports sustainable initiatives in the **protection of aquatic environments**, offering assistance over several years to promote their sustainability. It also supports graduate & research students who are recipients of the **HERA Awards** (see p.6) and creators of sustainability start-ups under the **SE'nSE Fund** (see p.12).

Find out +
www.fgf.be/fonds-aether

In collaboration with the Provinces of Namur, Luxemburg, Hainaut and Walloon Brabant, the Foundation rewards great local initiatives that demonstrate a 360° impact. A way to promote and connect local change actors!

Provincial Award
for Sustainable Development

Vents du Sud, winner of the 2018 Godefroid Sustainable Development Award in the Province of Luxembourg, is a **cooperative** in which members can invest according to their needs and become consumers of the output their investment is helping produce. This is done through Cociter, an electricity supply cooperative bringing together 14 citizen cooperatives in Wallonia, including Vents du Sud. The result is a **more direct energy distribution network between producers and consumers that is managed by citizens** to avoid price volatility.

The Saint-Pierre Clinic in Ottignies, winner of the 2019 Incidences Award of the Province of Walloon Brabant, innovates with its "**Hospital in transition**" approach, coordinating the implementation of innovative methods to reduce its environmental impact. The objective of the approach is fourfold: promoting technologies that reduce energy or materials needs, developing new tools, demonstrating a positive cost/benefit ratio over the long term, and making it applicable to other hospitals.

Find out +
www.fgf.be/prixprovinciaux

EXCHANGE OF GOOD PRACTICES BETWEEN PROVINCES

Since 2013, the Foundation for Future Generations has also been organising meetings and work days, bringing together local representatives concerned with sustainable development to exchange good practices, share experiences and encourage collaboration.

The capital which the Foundation can allocate is invested in funds that correspond to our values. Since the start, the Foundation has also chosen to invest part of its capital in the form of direct equity investments in businesses that are significantly committed to sustainable development.

Socially responsible investments

The Foundation has developed a socially responsible investments (SRI) portfolio based on strict societal criteria and with a long-term perspective. Its strategy is inspired by a benchmark of pioneering European foundations, carried out as part of the Foundation 3.0 programme (see p.27).

In addition to long-standing investments with Triodos, we encourage other asset managers to respond to our investment strategy as we have chosen to keep large donations within their banking ecosystem. A “test-lab portfolio” of shares was thus developed at BNP Paribas-Fortis, combining several extra-financial ratings.

Our primary societal impact investments

The Foundation finances 23 sustainable economy initiatives in 5 key sectors: energy, food, (micro) finance, fair trade, and construction and real estate. In addition, some funds hosted by the Foundation invest in sustainable initiatives that were selected during a specific call for projects. This is the case with the SE'nSE Fund (see pp. 12, 13 and 23).

EcoPower is the largest citizen energy cooperative in Belgium. With tens of thousands of cooperative participants, including the Foundation, **it produces 100% renewable local energy** and supplies Flanders. The cooperative brings together people who collect electricity from wind, sun and hydropower and produces sustainable green power. The Ecopower participants also try to save as much energy as possible together.

Hefboom offers funding, management advice and services to companies and organisations active in the social and sustainable economy sector, as well as to people who want to start their own business but do not have access to credit and finance. Hefboom is an **intermediary between cooperative investors** - individuals and organisations, including the Foundation - and **professionals in the social and sustainable economy** in Flanders and Brussels.

F'in Common is a cooperative, social economy fund in which citizens can invest their savings. The Foundation, through its Sustainable Finance Fund, provides a guarantee of €150,000 that partially covers the risks incurred, thereby contributing to the financial security provided to these citizen-investors. The Foundation is also a co-founder of F'in Common, alongside Financité and another 30 or so social economy companies.

NewB wants to become the first Belgian bank to be at the same time socially responsible, cooperative, ethical and sustainable. In 2019, NewB submitted an application and was registered as a credit institution before launching a large capitalisation campaign. The cooperative successfully raised €35 million in 6 weeks! After years of hard work, doubts and challenges, NewB obtained a banking licence at the end of January 2020.

Donations and support granted by the Foundation

HERA

The winners *(in italics)* received €7,500 for the Doctoral Thesis Award and €2,500 for other awards.

HERA - Doctoral Thesis

2019: *Antoinette M. Dumont (UCLouvain);* Christine Frison (UCLouvain - KU Leuven)

HERA - Sustainable Architecture

2019: *Annissa Rauw (ULB);* Kristel Mayenga (ULiège)

2020: *Chloé Dailly (ICHEC);* Pauline Coupez (UCLouvain)

HERA - Sustainable Cooperative Economy

2019: *Louise Claerbout (UCLouvain);* Gilles Jacquemin (ULB); Line Didelot (ICHEC)

2020: *Sibylle Halloy (UCLouvain);* Céline Marquet (ULiège)

HERA - Sustainable Democracy

2019: *Cécile Jadot (UCLouvain);* Elsa Ogien (UCLouvain)

2020: *Julie Delvoye (ULiège);* Charlotte Beco (ULiège); Claire Gauthier (ULiège)

HERA - Sustainable Design

2020: *Gaëlle Klinck (ESA St-Luc Bruxelles);* Doris Michel (ESA St-Luc Liège); Margot Souren (ESA St-Luc Bruxelles)

HERA - Sustainable Engineering

2020: *Chloé Ponsart (UMONS)*

HERA - Sustainable Design & Engineering

2019: *Erica Berghman (ULB)*

HERA - Sustainable Food Systems

2019: *Jérôme Braibant et Max Morelle (UCLouvain);* Nicolas Loodts (UCLouvain)

2020: **Clarisse** *Koren (ULB);* Alice Berten (ULB)

HERA - Sustainable Health

2019: *Walter Giordano (UCLouvain);* Pauline Minguet (ULiège)

2020: *Bénédicte Potelle (UCLouvain);* Laura Bonacini (UCLouvain); Nicolas Pierre (UCLouvain)

HERA - Sustainable IT

2019: *Jean-Claude Englebert (ULB);* David Junot (ULB); Antoine Sacré (UNamur)

2020: *Chlotilde de Meulenaere (UCLouvain);* Bénédicte Bazyn (ULiège); Céline Deknop, Adrien Hallet et Sébastien Strebelle (UCLouvain)

HERA - Sustainable & Responsible Finance

2019: *Nicola Virone (UCLouvain);* Clément Bourtembourg (ULB); Tristan Caballero-Montes (UMONS)

2020: *Isaline Thirion (ULiège);* Astrid Pierard (UCLouvain); Rémi Valepin (UMONS)

SE'NSE

The winners received a convertible subordinated loan of €50,000.

2019: Oh My Box! (A. Goffin) - Monceau-sur-Sambre; Usitoo (F. Chomé, X. Marichal) - Bruxelles; urbike (D. Lefebvre, P. Lovens, R. Sarrazin) - Bruxelles

2020: BC materials (N. Coeckelberghs, K. De Cooman, A. Maertens) - Bruxelles; Entusia (M. Van den Broeck, H. Versmissen) - Vosselaar; Little Green Box (S. Gonzalez) - Bousval

PROTECTION OF AQUATIC ENVIRONMENTS

2020-2022: Coral Microreefs Madagascar (I. Eeckhaut et G.G.B. Todinanahary) - 22.200 €; The Great Bubble Barrier (F. Zoet) - 40.000 €; WeOcean (L. Bissey) - 45.000 €

STUDENTS ENTREPRENEURS

2019 - Zero Waste Student Challenge:
Antwerp Circular (UAntwerpen) - 500 €; #AUTOnietmijnMAAT (UGent) - 500 €; La Boîte à Gants (ERG - Bruxelles) - 5.000 €; Briocoli (UNamur) - 500 €; Duurzame studentenverenigingen (UGent) - 500 €; Atelier Empreinte environnementale et sociétale (ULiège) - 500 €; Fais pas de bourde, prends ta gourde! (ULiège) - 2.500 €; Gourde pour tous (HELHa Mons) - 1.000 €; Green On (UNamur) - 1.000 €; Tiffin (ENSAV Bruxelles) - 2.500 €; Récupérathèque (ESA Saint-Luc Bruxelles) - 2.500 €; Stick to Reusables (KU Leuven) - 500 €; StuBooks@UGent (UGent) - 1.000 €; Students Swap Stuff (KU Leuven) - 500 €; Turtlee Green (UAntwerpen) - 500 €

2019: BooTrek (M. Daniels, J. Sartor, L. Smets) - Liège - 5.000 €; Chef des mots (T. Hembise, T. Trimpont) - Charleroi - 2.300 €; Fline (A. Jacques de Dixmude, Z. Roland) - Louvain-la-Neuve - 5.000 €; Greenzy (A. Biebuyck, L. Dupret, F. Milano) - Louvain-la-Neuve - 5.000 €; Insens (G. Francaux, N. Verbeek, G. Waterlot) - Louvain-la-Neuve - 4.500 €; Tulipal (Y. Bouaine, G. d'Hoop, C. de Guirao, L. Secades, L. Soggiu) - Bruxelles - 5.000 €

2020: Baggies (T. Baeyens, T. De Landtsheer) - Coutrai - 5.000 €; BoBo (C. Turbang, L. Wallyn) - Bruxelles - 5.000 €; Bright Energy (A. Van Acker, L. Van Acker, S. Van Acker) - Gand - 5.000 €; Deformup (T. Descheemaeker, M. Jerbi) - Louvain-la-Neuve - 4.000 €; Easy Remote (F. de Hoog, J. De Vos) - Courtrai - 5.000 €; Ecopoon (C. Ernst, M. Vanderheyden) - Liège - 5.000 €; GoPeda (B. Deby, D. Roossens) - Louvain-la-Neuve - 4.000 €; Lightning Tree (L. Lens, S. Bertrand) - Gand - 2.000 €; NeoFinder (M. Degeldt, H. Hannouni, R. Kasenga, C. le Ray, Q. Vandenborre) - Bruxelles - 5.000 €; PeeCycle (J. Jacobs, H. Lechat) - Bruxelles - 5.000 €; Waste End (L. Brousmiche, N. Pletinckx) - Mons - 5.000 €

PROVINCIAL AWARDS

Trophées Incidences

2018: **Abbaye de Villers**; Graines de Vie; Nos Oignons

2019: **Clinique Saint-Pierre d'Ottignies**; Axedis ETA; Les pieds dans la Dyle; **Yellow Events**; Brasserie Valduc-Thor; Incredible Oasis

Hainaut horizons

2018: **COOPECO**; Nekto; Régie d'habitat rural en Val de Sambre

2019: **Coprosain**; Ecotop; Ferme Delsamme

Godefroid du Développement Durable

2018: **Vents du Sud**; Ell'laine

2019: **Epeautre d'Ardenne**; Dureco; La Vrac Car

Prix du Développement Durable de la Province du Namur

2018: **Cyréo**; L'Air du Temps; Terre-en-vue

2019: **Cycle en Terre**; Brasserie de la Lesse; La Flobette

JACQUES COX FUND

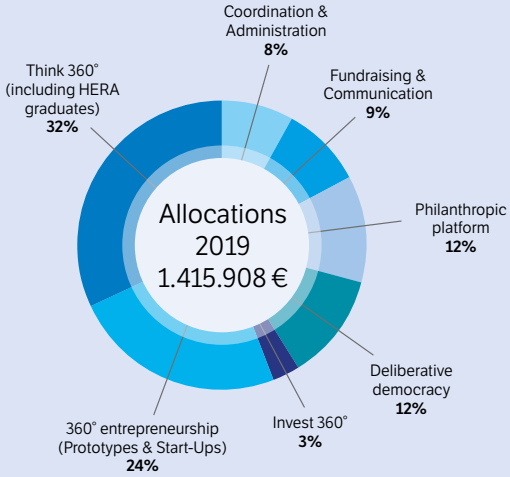

2020: 100,000 Swiss francs were invested in the form of a convertible loan to support the development of the Swiss start-up Clearspace, specialising in the recovery of space debris.

The Foundation's wide range of activities rely on the many forms of support it receives from volunteers as well as from individual donors (in particular through the fundraising programme "Gold Share"), and from the funds hosted by its patrons, partner companies, foundations and private or public institutions.

Some figures
that reflect our work

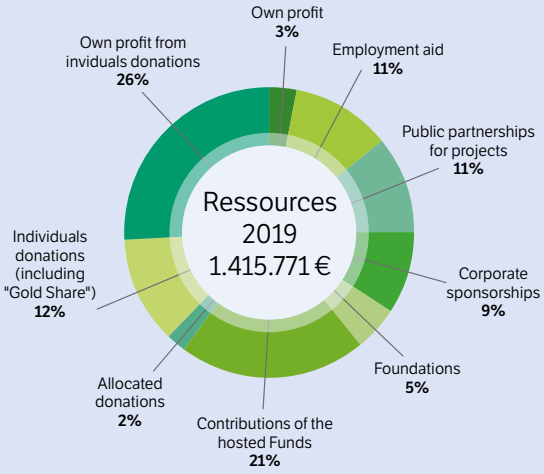

How do we allocate
the funds we receive?

Young graduates now represent almost a third of our beneficiaries, a number that has grown steadily over the past decade. Although young (future) entrepreneurs, creators of prototypes and 360° start-ups are a more recent focus, these already received a quarter of our resources in 2019. In addition, activities linked to deliberative democracy, which the Foundation has been concerned with for more than 20 years, mobilise more than a tenth of resources, allocated mainly to the actions of the G1000.

You give us
the means to act!

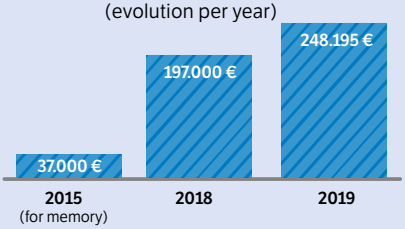

In 2019, nearly two-thirds of the Foundation's financial resources - which are also increasing - came from you, individual donors and patrons, through hosted funds! Further strengthened by the contribution of partner companies and other foundations, you therefore guarantee our independence and give us the capacity to support more and more projects. The contribution of public authorities represents just over a fifth of our resources and remains stable.

Strong growth capacity to provide financial support

The increase in the number and total amount of financial grants by the Foundation is now secured beyond 2019 (see pp.18-19). We can only continue to offer this extra leverage to the projects thanks to the ever-increasing number of those who trust and support the activities of the Foundation.

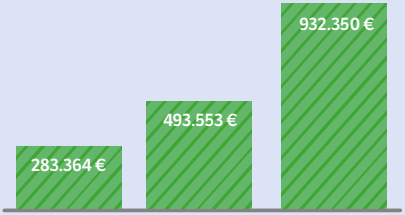

EVOLUTION OF DONATIONS ALLOCATED BY THE FOUNDATION (evolution per year)

Using financial capital as a boost for 360° transformation°

The Foundation has made the rare choice of investing a majority of its financial assets in primary impact businesses (see pp.16-17). Since 2015, this decision has been strengthened, along with the growth of our financial assets, to flourish during the recent subscription campaign of the recently launched NewB bank. Today, this "portfolio" of 23 initiatives, symbols of an ethical and sustainable economy, measures nearly one million euros.

FIRST IMPACT INVESTMENTS (cumulative evolution)

YOUR MONEY IS ADMINISTERED PROPERLY AND TRANSPARENTLY

Every year since its creation in 1998, the Foundation's accounts have been audited in accordance with legal and statutory provisions. The firm mandated in 2018 and 2019 is "Maillard, Dethier & C°, auditors".

Maillard, Dethier & C°

Do you believe our society must evolve to face the challenges of tomorrow? We do too! Discover the possibilities available to you to support the Foundation and you will be rewarded for your generosity during your lifetime! As a Public Utility Foundation, the Foundation for Future Generations can receive donations and bequests at favourable tax rates.

Do you want to support sustainable initiatives?

«Une action en or», ou le meilleur moyen de se défaire de vieux titres

LE RÉSUMÉ

L'Echo

Invest in **a Gold Share**

Turn your weaker financial securities (low-value stocks and bonds, which incur costs for you; securities that are blocked/with complex inheritance, etc.) into good deeds! An easy gesture to create societal value from almost nothing. This is possible for those who have a securities account with one of the banks participating in the "Gold Share" operation: Belfius, BNP Paribas Fortis, Crelan, Degroof Petercam, Dierickx Leys Private Bank, ING, CBC, KBC / Bolero, Nagelmackers.

Make **a gift**

Each gigt increases the transformative reach of the Foundation. Following the COVID-19 crisis, the federal government has taken a series of measures in favour of the philanthropic sector, including increasing from 45% to 60% the income tax rebate for gifts over €40 made in 2020 to approved institutions.

Donations in 2020

at the increased tax rebate of **60%**

Make **a donation**

You can choose to provide a space or an item so that they benefit the generations to come after you. Those donations are eligible for greatly reduced duties (Brussels 6.6%; Flanders 5.5%; Wallonia 7%).

Make **a (dual) bequest**

Besides leaving your belongings to family and friends, you can choose to put them to another use and make a lasting gesture for future generations.

// I felt in tune with the Foundation's projects and approach. So I wrote my will accordingly. I feel reassured. I can leave tomorrow, as everything is settled and perfectly in line with my convictions. //
Agnès L., Testator

Create **your own fund**

This registered fund will allow you to act in favour of future generations during your lifetime by supporting one or more actions of the Foundation and/or by initiating new specific actions, after discussion with the Foundation. This is a choice that our patrons Pierre Mottet, Marguerite Vanhee and Philippe Rotthier have already made.

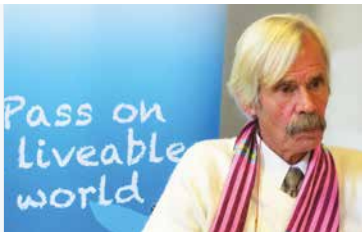

SE'nSE FUND

ALBERT VANHEE FUND FOR FUTURE GENERATIONS

PHILIPPE ROTTHIER FUND FOR FUTURE GENERATIONS

Pierre Mottet, is the founder of the SE'nSE Fund, a philanthropic investment fund created for the benefit of sustainable start-ups in need of financing.

www.fgf.be/fonds-sense

Marguerite Vanhee, founded the Albert Vanhee Fund for Future Generations, which helps student entrepreneurs in the prototyping phase of their sustainable innovation.

www.fgf.be/fonds-albert-vanhee

Philippe Rotthier, is the founder of the Philippe Rotthier Fund for Future Generations, for the benefit of graduate and research students who look at the world of tomorrow at 360°.

YOUR DONATION, BEQUEST OR FUND

To develop a personalised formula for your support to future generations, we invite you to contact the Foundation for Future Generations via the secretariat of Benoît Derenne, director, at +32 (0) 81 22 60 62. You can transfer the amount of your desired donation (one-off or standing order) directly into the Triodos account of the Foundation for Future Generations - IBAN: BE98 5230 4030 5393 - BIC: TRIOBEBB. You will be entitled to a tax rebate for any donation of €40 or more.

Never before has the Foundation brought together so many people for an event: more than **500 participants** for this 1st edition of the Future Generations Summit! Beyond the number, it is the **diversity** of participants that was remarkable: students (more than 120), **project leaders**, **entrepreneurs**, **academics**, **public institutions**, **actors in the financial or philanthropy sectors** etc.

The Future Generations Summit, a meeting place for a vibrant community of changemakers

This event was the perfect illustration of the Foundation's desire to "open up the worlds", to create links between different stakeholders within a growing community that is mobilised for future generations.

The "Meet the Changemakers" space offered a "giant speed dating" with 29 sustainable initiatives as an original way to meet change agents from the four corners of the country who belong to the vibrant and inspiring community of the Foundation.

Three "Horizon 2030" thematic workshops offered wide ranging views of what education, food and housing could look like in a world that has successfully met the challenge of the 17 Sustainable Development Goals.

The "Transformative Power of Money" conference brought together 370 participants. David Pitt-Watson (UK) shared his vision of a finance that must (re)position itself at the service of society. The members of the panel highlighted the intertwined nature of stakeholders in the financial world, the systemic role of finance and the role that citizens can play in strengthening the transformative power of their money.

Several times a year, **the Foundation brings together the CEOs of the 'Business, Innovation and Sustainable Development Circle'**, a group launched at the end of 2012 and which today has around thirty CEOs from very diverse sectors as members. These meetings - just like the Future Generations Summit - are an opportunity to reflect and share solutions to help the business world evolve towards a more sustainable economy.

Find out +
www.fgf.be/summit

"Alone we advance quickly, together we advance further". Through meetings initiated by the Foundation itself or by other partners wishing to work towards a more sustainable world, we work together with various members of society on collective initiatives to challenge the status quo, starting now.

Acting collectively to create a transformative leverage effect

PDG: Grünes Licht für die Einführung eines ständigen Bürgerdialogs in Ostbelgien – „Politik darf sich nicht der Verantwortung entziehen"

Van Reybrouck: „Heute ist ein großer Tag"

GRENZECHO

With the support of the **G1000 and the Foundation**, the German-speaking Community of Belgium (Ostbelgien) became, on 25 February 2019, the first region in the world to integrate the **permanent participation** of citizens picked at random in political decisions. On this basis, the G1000 also organised a **Summer School** and wrote a **paper covering 15 questions** to guide public authorities in the implementation of citizen deliberation.

// This is a crucial step in democratic innovation. The model is based on many years of experience, but precisely because it is plugged into the existing political system, it is one of the most far reaching models to date. Citizenship in Ostbelgien will change for the better this way. That's our deepest wish. // **Benoît Derenne**, G1000-cofounder and CEO of the Foundation for Future Generations.

As partner of the VILCO project supported by Innoviris, the Foundation is pleased to share the published research paper **"The Collaborative City, when citizens' assemblies and local authorities work together"**, released in May 2020. The report describes the local testing done as part of the 3-year research in participatory action carried out by the VILCO consortium. The report also offers 6 recommendations for better collaboration, as well as many tools and resources for those who wish to take the experiments further.

Find out + **www.vilco.brussels**

Steered by Foundation, the **Foundation 3.0 roundtables** mobilise all the resources of the participating foundations to induce systemic positive change. The 2019 edition in Paris brought together 15 European foundations to explore the topic of "**Managing risks and adapting our support**: **foundations facing new threats**". Given the public health context, the 2020 edition has been postponed to 2021 and will be held in Amsterdam with "NextGen Philanthropy" as a theme.

Find out +
www.fgf.be/fondation3_0

The 2nd edition of the **SDG Forum** gathered over 1,000 participants! The Foundation, a partner in the event, organised a workshop in collaboration with UAntwerpen, and explored with a high-level panel (EVPA, Fondation de France, Solifin) **how to maximise the contribution of impact investing in a more sustainable development.**

Find out +
www.sdgs.be

The Foundation's SE'nSE Fund joined the **Solifin** platform, which offers companies with a positive societal impact **easy access to information and financing**. Solifin is also strengthening collaboration between impact funders who subscribe to its ethics charter. Along with many other organisations, **the Foundation contributed to the discussions that led to the set-up of the platform** and is represented on its Ethics Committee.

Find out +
www.solifin.be

The Foundation also participates, on an ad-hoc or continuous basis, in the discussions and actions organised by many other groups such as The Shift, European Foundation Center, EDGE Europe, Environmental Funders Network, LesFondations.be, Plateforme pour le Service Citoyen, Youth for Climate, Move for Tomorrow, Be.Impact, Impact Now, The Gobal Research Alliance for Sustainable Finance and Investment.

From the entire Foundation team "thank you"!

VILCO

The Communes of the City of Brussels, Etterbeek, Uccle and Watermael-Boitsfort, as well as six citizen groups attached to these municipal territories.

THANK YOU TO THOSE HAVE SET UP FUNDS, AND TO OUR PATRONS, SPONSORS AND DONORS!

Albert Vanhee Fund for Future Generations

Thank you to Marguerite Vanhee for choosing to create, in memory of her father and within the Foundation, a fund that passes on to the young generations his spirit of dedication to concrete invention.

Management Committee: Marcel Miller, Chairman; Laura Beltrame; Benoît Derenne

Aether Fund for Future Generations

Thanks to Christian Simonard for realising, through the Foundation, his philanthropic actions in favour of the protection of marine and river environments, and in favour of other actions of the Foundation.

Management and selection committee: Christian Simonard, Chairman; Benoît Derenne

Jacques Cox Fund

Thank you to Jean-Marc Van Nypelseer, who has chosen to launch this Fund in memory of his grandfather and his vision of open and accessible science that works for the common good.

Management Committee: Jean-Marc Van Nypelseer, Chairman; Benoît Derenne

SE'nSE Fund

Thank you to Pierre Mottet for having chosen the Foundation to implement his vision on sustainable, transformative environmental entrepreneurship.

Management Committee: Pierre Mottet, Chairman; Benoît Derenne

Sustainable Finance Fund

Thank you to everyone who has donated to the Golden Share scheme! They have helped the Foundation and the Réseau Financité create a special fund focusing on the particularly critical issues of ethical and responsible finance.

Management Committee: Bernard Bayot; Benoît Derenne

Philippe Rotthier Fund for Future Generations

Thank you to Philippe Rotthier, who, since 2014, has placed his trust in the Foundation and its work in the academic world (HERA).

Management Committee: Philippe Rotthier, Chairman; Louise Bélenger, his granddaughter; Benoît Derenne

Donation of Hébergerie CO_2 Solidaire

Thank you to Christina De Wilde and Benoît Laduron, who have placed their trust in the Foundation since 2015, so this little gem near Durbuy, which is considered to be of public interest, is maintained.

Sponsors

Thank you to the Sponsors of Future Generations, who have made a commitment over a number of several years, to support the HERA youngsters through the Foundation.

Donors

Be they private individuals, companies and institutions in Belgium and elsewhere, we are grateful to the many benefactors who support the Foundation every day or encourage their loved ones to do so on the occasion of life events (weddings, birthdays, etc.).

We also thank all those taking part in Gold Share (Action en Or)!

Testators

Thank you to those who have made a positive and lasting gesture for the benefit of future generations by leaving bequests to the Foundation.

AND THANK YOU TO OUR VOLUNTEERS !

Board of Directors

François Ost, Chairman; Francis J. Blake; Marie Geukens; Brigitte Gloire; Pierre Guilbert; Ludo Hilkens; François Schwennicke

Estate planning

Martin Vanden Eynde (Successio)

Projects and events

Thank you to the volunteers, interns and students who volunteer for the Foundation by providing support with translations, the hosting at events, research work or administrative tasks.
