To apply to this call for projects of the Foundation for Future Generations, please send the application form, investor deck and annexes before 16/08/26 midnight, on [our website](#).

Based on the evaluation of the jury, 4 to 8 projects will be invited to pitch in front of the jury on the 8th of October.

The selected projects will receive a subordinated loan of up to €50,000 and will benefit from a communication campaign in November and December.

Initiated by

Thanks to the contribution of

With the support of

1. What is it about?

The Foundation for Future Generations launches **the 11th edition of its SE'nSE call for projects for sustainable start-ups with a positive impact on the environment.**

The selected start-ups are offered seed capital in the form of a **subordinated loan**. The aim of the Foundation for Future Generations is to pass on a liveable world by promoting and supporting **sustainable entrepreneurship**. By providing seed financing, the Foundation for Future Generations wants to help **early stage, quality, impact-driven projects** bridge the gap between 3F stage (Family, Friends & Fools) and a more stable stage with easier access to traditional sources of financing.

The projects will be selected by **an experienced Jury**. The main selection criteria are their **positive impact on the environment** and the quality of the **business plan** and its underlying strategy.

Start-ups in a great variety of sectors can be selected. Find out who the **laureates** are of the 10 previous editions.

This support to sustainable entrepreneurs is a **non-for-profit program** (see point 4), made possible by the multiannual financial support of the **SE'nSE Fund**, created by entrepreneur Pierre Mottet, and the **Aether Fund for Future Generations**. For this edition, this program also gets support from Bruxelles-Environnement/Brussels-Leefmilieu, the Flemish Region, the National Bank of Belgium and une Action en Or/een Gouden daad.

2. Awards

Each year the Foundation for Future Generations awards subordinated loans, with a maximum of **up to €50,000 per project**. This amount is subject to the development stage¹ and quality of the projects and their subsequent financial needs - the jury reserves itself the right to award an amount inferior to the one requested). On average, the amount received by the winners is €37,500.

Since 2016, 32 startups have benefited from €1,205,000 in loans. It has been demonstrated that this seed capital contributes to opening doors to other, more traditional sources of funding.

3. What else?

In addition to financial support, the Foundation for Future Generations provides **valuable feedback** based on the insights of the Jury, which is composed of highly experienced professionals in the fields of impact investment, entrepreneurship, management, impact evaluation and business support for start-ups. This feedback will be shared with all candidates, selected or not. This way we aim to help all the candidate projects to improve their skills for their future funding applications.

¹ Both pre-seed and seed stage start-ups are eligible for this call and depending on the stage of development of the applicant, the jury may decide to award more or less of the requested amount. For example: 30K€ in the pre-seed stage and 50K€ in the seed stage.

The Foundation's ambition is not to provide close support or coaching to the selected entrepreneurs. However, thanks to its large network of entrepreneurs, financiers, experts, researchers, it will facilitate **networking** with relevant persons or organisations whenever possible.

Laureates often put the SE'nSE support forward as a kind of **label**, to convince other investors of their potential positive environmental impact as well as the entrepreneurial capacity of the team, after a high-quality jury has selected them at the end of a very competitive process (over 20 applications each year).

The selected entrepreneurs will be presented in a **national communication campaign** (in the 3 regions of Belgium) which has proven to create a huge added value for the winners over the years in terms of visibility of their project known to a large public and attraction of new clients and partners.

4. Funding philosophy

The SE'nSE Fund is a **philanthropic investor**: this seed funding program of the Foundation for Future Generations is not designed to generate any profit for its founder and contributors, but to remain sustainable in the long term.

The terms of the loan and the non-binding mechanism for an additional contribution (Pledge) are designed to, on one hand, favour a reasonably fast flow of lending / reimbursing / lending (loan repayments and interests are fully reinvested in next editions) ; and on the other hand, contribute in the longer term to the sustainability of the SE'nSE Fund over the years. In this spirit, start-ups that achieve significant success are encouraged to partially compensate for the losses inherent in early-stage, risky intervention and make a philanthropic contribution to ensuring the Fund's ability to support a maximum of start-ups.

This philosophy has three concrete implications:

- Start-ups that do not sufficiently demonstrate the **capacity to, at a minimum, reimburse this loan** will not be selected.
- Although the allocated money may remain in the hands of awardees for a long period (10 years) the Foundation for Future Generations will **incentivise a rather quick repayment** or return to the fund (see typical terms below).
- it is expected that the supported startups adhere to this philanthropic vision and express the possibility of one day becoming a financial contributor if their company is successful. This is materialized through the **signing of a non-binding Pledge** through which the entrepreneurs recognize the value of the philanthropic support offered by the Foundation for Future Generations at a risky stage of their development ; and state that if in the future their company is successful, they will consider some "giving back" to sustain the SE'nSE and the Foundation's actions and allow it to support new impact entrepreneurs

5. Typical terms

Funding will be in the form of a loan.

In consideration of the funding philosophy, the typical funding would be as follows:

- Subordinated loan
- For a period of 10 years
- 0 % interest for the first 18 months, 5 % for the next 18 months and 10 % for the following years. For example: repayment after 3 years would result in a mean interest rate of 2,67%.
- Change of control or dividend payment will trigger early repayment of the loan
- The entrepreneurs become part of Entrepreneurs' Pledge for Future Generations
- The funds granted by SE'nSE are part of a broader fundraising round. The amount awarded to a winning startup will only be released once it demonstrates proof of co-financing enabling it to achieve its objectives.

The Jury may attach additional conditions which are considered relevant to the financing of the project.

6. Eligibility

Only the candidates that fulfil these conditions are eligible. Applications that don't meet these criteria will not be sent to the jury for further assessment.

The organisation:

- must have significant (potential) positive impact on the environment;
- must be an early-stage start-up business, meaning that the candidate entrepreneur should have established its company recently (no longer than 3 years ago);
- should be established in Belgium;
- shows potential recurring revenue streams that will cover at least its cash needs, including repayment of the funds;
- must demonstrate significant changes in the project if it has already applied in a previous edition

The founder(s):

- plan(s) to work full time for the project (it cannot be a side project) and is (co-)responsible for the daily management of the company;
- speaks English, as both the application form and the oral presentation to the jury must be delivered in English;

The financial needs:

- The Foundation for Future Generations' loan should make a difference in the success of the project. This means that the projected financial needs to realise the project should be between 100.000 and 1.000.000€ over the next 2 years.

Candidates to the [Shinju](#) call for projects may also apply to the SE'nSE call (and vice versa), if they meet the eligibility criteria.

7. Selection criteria

The key selection criteria that the SE'nSE jury will consider when assessing the projects are:

- the (expected) positive impact the project will have on the environment and the measurement methodologies that will track it;
- the quality and sturdiness of the business plan and the underlying strategy;
- The financial and extra-financial difference (leverage effect) the SE'nSE support will make

Other important criteria include:

- the **quality of the team**: experience, complementarity covering required skills for a start-up (such as: entrepreneurial, marketing, financial...). It is strongly recommended that the whole founding team be present during the jury presentation;
- the **competitive advantage** (Unique Selling Proposition);
- the way the team plans to “walk the talk” and **integrate the key sustainability values** (People, Planet, Prosperity, Participation)

8. Complete application pack

Pitch Deck (maximum 20-slides investor deck):

Please note that the first round will be based solely on the investor deck. If your project advances to the second round, the jury will then review the application form and the other attachments. The pitch deck must therefore be fully self-explanatory and able to stand on its own.

You are free to choose both the content and the format. However, the deck must include at least:

- Some financial data, including at minimum: the breakeven point (expected date when revenues covers expenses), burn rate (monthly and annually recurring expenses), and recurring revenues (monthly and annually – MRR and ARR);
- Quantified data regarding your sustainable impact, for example: an impact P&L or clear KPIs (CO₂ emissions, energy consumption, waste avoided, etc.).

Application form: This document can be downloaded from our website and must be completed in English. Please note that this form is intended to provide additional information complementing your investor deck.

P&L: A template can be downloaded from our website and completed. Feel free to adapt this template to your specific situation, but please keep it concise.

Co-founders' resumes: Please attach the CVs of all co-founders to your application.

9. Agenda call for projects 2026

- Launch call: **26/05/2026**
- Deadline for application: **16/08/26**, midnight. Please upload your contact details and your full application to [our website](#).
- Announcement of the 4 to 8 candidates invited to present their project to the jury, based on the evaluation of their application by the jury: **end of September**
- Pitch in front of the Jury: **08/10/2026** in Brussels
- Public announcement of the laureates and national communication campaign: **in November and December**
- The *Future Generations Summit*, an event celebrating all the award-winning initiatives of the year 2026 (mandatory presence for laureates): **3 December 2026**.

Appendix: Rights and Management of Applicants' Personal Data

Applicants whose personal data is being processed have the rights set out below.

1. Right of Access and Information

Applicants have the right to access their data, meaning the right to access, without having to justify their request, the personal data concerning them that is processed by the Foundation. They may also request a copy of the processed data.

2. Right to Rectification

Applicants have the right to obtain from the Foundation, without undue delay, the correction of personal data concerning them that is inaccurate, incomplete, or outdated.

3. Right to Erasure (“Right to be Forgotten”)

Applicants may require the Foundation to erase their personal data without undue delay in the following cases:

- the personal data is no longer necessary for the purposes for which it was collected;
- the processing of the data was based exclusively on the applicant's consent, which has since been withdrawn;
- the applicant objects, on legitimate grounds, to the processing.

4. Right to Restriction of Processing

Applicants have the right to obtain from the Foundation the restriction of processing relating to their personal data where one of the following applies:

- the accuracy of the personal data is contested by the applicant, in which case the restriction applies only for a period enabling the Foundation to verify the accuracy of the personal data;
- the processing is unlawful, and instead of erasure, the applicant requests the restriction of its use;
- the Foundation no longer needs the applicant's personal data for processing purposes, but the data is still required by the applicant for the establishment, exercise, or defense of legal claims;
- the applicant is able to demonstrate that they have objected to the processing.

5. Right to Data Portability

Applicants have the right to request that the data they provided to the Foundation be transmitted to them in a structured, commonly used, and machine-readable format. Furthermore, applicants have the right to transmit their data to another data controller without hindrance from the Foundation.

Applicants may also request that their data be transmitted directly by the Foundation to another data controller where technically feasible.

6. Right to Object

Applicants have the right to object at any time, on grounds relating to their particular situation, to the processing of personal data concerning them.

In such a case, the Foundation must immediately cease processing the data in question unless it demonstrates compelling legitimate grounds for the processing that override the interests, rights, and freedoms of the applicant, or grounds relating to the establishment, exercise, or defense of legal claims.

7. Exercising These Rights

Applicants wishing to exercise any of the rights described above may contact the Foundation directly via: sense@futuregenerations.be.

In carrying out their duties, the Data Protection Officer (DPO) is bound by professional secrecy, confidentiality, and independence obligations.

As the requests concern personal and therefore confidential data, any request from an applicant must be accompanied by proof of identity, in particular by providing a copy of their identity card.

The Foundation or its DPO undertakes to respond to any request within a reasonable timeframe and, in any event, within a maximum period of one month from receipt of the request.

Depending on the complexity of the request, and in accordance with the GDPR, the response period may be extended to three months.

In the event of disagreement or refusal to respond, applicants have the right to lodge a complaint with the Data Protection Authority (DPA) or initiate legal proceedings before a court.

17. Complaints to the DPA

Applicants have the right to lodge a complaint at any time with the DPA if they believe that the processing of their personal data constitutes a violation of the GDPR.

The DPA can be contacted via its website at the following address: www.dataprotectionauthority.be
